

AHMED SULAIMON

07436195968 | London, UK | Sulaimonahmed08@gmail.com | LinkedIn: <https://shorturl.at/7Cuew>

Graduate Software Engineer with practical experience building real-world solutions and collaborating in cross-functional teams. Strong foundation in Python and C#, passionate about building scalable software that reaches real users.

Education

BEng Software Engineering (1st Class Honours - Achieved)

Sep 2022 – May 2025

Sheffield Hallam University

Sheffield, UK

Relevant Coursework: Databases, Machine Learning, Software Architecture & Design, Web Technologies.

Experience

Sheffield Hallam University

Jan 2025 – May 2025

Junior Software Instructor & Student Mentor

- Provided hands-on support to over 40 students during Mobile App Development labs, debugging Flutter and Android Studio projects, and improving code quality by 25%.
- Provided 1:1 and small group mentoring on app development, version control (Git), and basic software architecture, boosting student performance and confidence.
- Collaborated with academic staff to enhance technical lab content, aligning it with software engineering principles and improving engagement with second-year students.

Bright Network – IEUK 2024 (in partnership with Lloyds Bank, BT Group)

July 2024

Technology On Demand Intern

- Worked on an agile project simulating a commercial tech workflow using tools like Jira, GitHub, and CI/CD pipelines.
- Gained insight into building infrastructure-ready, testable, and scalable applications.
- Attended sessions on data-driven product design, communication in cross-functional teams, and career progression.

Scrapays - Startup building tech for recycling businesses

Jun 2023 – Aug 2023

Software Engineering Intern

- Delivered front-end features using React.js and Next.js, boosting user engagement by 10%.
- Designed and implemented responsive UI components with Tailwind CSS, contributing to improved usability across devices.
- Integrated REST APIs with MongoDB, reducing latency by 20% and ensuring reliable performance.
- Collaborated with UX, QA, and DevOps teams to accelerate release cycles and implement CI practices.

Personal Project

Automated Grocery Price Comparison App

2025

- Built a system that compares and forecasts grocery prices from major UK retailers using Python-based services.
- Developed web tools that automatically collect live pricing data to support accurate market tracking.
- Used a structured database to store and search product information efficiently.
- Designed a mobile app with Flutter to display helpful price insights and recommendations in a clear, user-friendly format. Technical Blog: <https://shorturl.at/kx4t6> | GitHub Repo: <https://shorturl.at/oF6tW>

Key Skills

- **Technical:** Python, TypeScript, JavaScript (ES6+), PostgreSQL, MongoDB, React.js, Node.js, Next.js, Docker, CI/CD, Git, C#, HTML5, CSS3, Unit Testing, Integration Testing, Data Structures, Algorithms, Figma
- **Soft Skills:** Communication, Teamwork, Problem-Solving, Mentoring, Attention to Detail

Certification

- AWS Certified Cloud Practitioner (CLF-C02)
